

A young man and woman are smiling and leaning against a large, modern window. The woman is leaning over the man's shoulder, and both are looking out the window. They are wearing white t-shirts. The background shows a bright, sunny day with a view of a city and greenery.

Everglade Windows' policy is one of continuous improvement and we reserve the right to change specifications without prior notice. Performance information can vary based on a number of factors including, but not limited to, the size, weight, style, glass spec and location of the product. Images are for illustrative purposes and are not binding in detail. The representation of colours, and textures are limited by the print process and may vary.

‘To be the best in all we do!’

At Everglade Windows, we are devoted to progressive thinking and pushing boundaries. We have adapted to the challenges that have presented themselves over the last 35 years and, with a rigorous attitude, have built legendary windows and doors.

Our culture is one of being inclusive, embracing diversity, to be part of the family, and to create a sense of belonging - not only with our staff and customers, but with our partners and suppliers. We give customers certainty and a level of service that creates a unique sense of affinity for what we stand for.

Over 35 Years of Manufacturing

Every product we manufacture is made with care and expert precision in our two manufacturing facilities in West London.

We have been awarded BS EN ISO 9001:2008 for the manufacture of UPVC and aluminium windows and doors.

Everglade practices lean manufacturing enabling us to improve efficiency and reduce waste. Our production facility offers an impressive balance of automation backed by the human touch – a workforce of fully trained specialists.

Manufacturing automation is backed by years of product knowledge. Our skilled craftsmen, Installation team and Support team collectively have formal qualifications in Customer Service, Lean Techniques, Window Installation and Window Manufacturing.

Kitemark Accredited Survey & Installation

As a Kitemark Installer, Everglade has a wealth of installation and survey expertise. Installations are carried out by our own fully trained teams. Everglade is one of the few companies to invest in training and each fitter must attend regular programmes in our own purpose built training workshop. After all, the quality of your new windows and doors is only as good as the fitters who install them. We are accredited by BSI Kitemark and FENSA to ensure our windows are fitted to a high standard.

We are also QMS accredited for the Manufacture of UPVC and aluminium, windows and doors. This International Standard promotes the adoption of a process approach when developing, implementing and improving the effectiveness of a quality management system, to enhance customer satisfaction by meeting customer requirements.

Peace of Mind Guarantee

Our windows and doors are equipped with a multi-point locking system, high security locks and hinge clasp are all as standard. No wonder why our UPVC windows & doors are Secured by Design (Police preferred specification). By opting for Everglade, you are making your house safer than ever.

Installations carried out by Everglade include a comprehensive ten year guarantee. As a company established over 35 years with thousands of satisfied customers, you can have complete peace of mind when choosing Everglade.

Ecotherm 50 Casement Windows

Ecotherm 50 windows have been designed to reduce heat loss by the use of a thermally broken aluminium frame with a polyamide bridge. The polyamide material has a very high resistance to heat transfer from the inner face of a frame (i.e. inside a room) to the external face of a frame (i.e. outside). The thermally broken frames provide homeowners with windows and doors that have distinct advantages.

Strength & Durability are provided by the use of Aluminium sections which gives structurally sound windows and doors for your peace of mind.

Warmth & Comfort are benefits enjoyed by homeowners because Ecotherm 50 windows and doors are thermally efficient and contribute to a reduction in the cost of heating bills.

- ① 70mm frame depth as standard
- ② Polyamide thermal break
- ③ Slim sightlines with lowline gasket
- ④ Flat sash
- ⑤ Available in any RAL colour. Dual colour and textured finish option also available
- ⑥ Option of internal or external beading
- ⑦ High security interlocking bead is very difficult to remove once glazed

Ecotherm Plus Resi Door

Our handsome range of entrance doors will impress your guests and keep out both the elements and unwelcome intruders. Our Ecotherm doors are designed for use as open out or open in, single or double doors, internally beaded with side-light and low threshold options.

Ecotherm Plus doors are a high performance alternative suitable for use in high traffic or exposed areas where a durable and reliable door is required.

Elegant, yet strong and durable Ecotherm doors enhance the beauty of your home, keep in the warmth and let in more light because of the slim sightlines.

Peace of mind is ensured by the enhanced security provided by a multi-point locking system.

Art Deco Finishing Touches

Designed to replicate traditional steel windows, the Heritage 47 suite is ideal for traditional heritage and modern art-deco projects alike

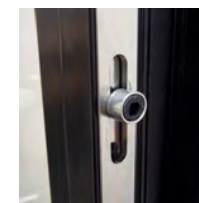

The Heritage 47 window is designed to be built as a series of horizontal modules which can be stacked using horizontal couplers to form a multi-part window featuring a specially design drip bar between modules.

The Heritage 47 door is the ideal replacement for steel balcony doors on heritage applications such as building renovations or apartment conversions. The door provides the solution for conservation areas where planning regulations require a like-for-like product replacement.

Heritage 47 door profiles feature the system's signature slim sightlines and elegant lines that complement existing Heritage 47 windows and mimic those of steel doors. The system has all the advantages of modern aluminium profiles that feature polyamide thermal breaks, allowing the system to achieve a U Value of 1.5 W/m2k when installed with a suitable sealed unit.

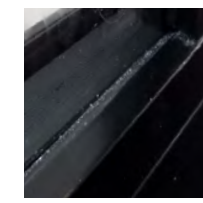

Duplex sealed unit creates authentic period look

CF 68 Bi fold Door

Answering the needs of contemporary architecture, the Concept Folding 68 system combines design, comfort and space efficiency. The wide range of possibilities to unfold numerous glass panes makes the borders between in- and exterior literally vanish. The folding principle of this high quality system allows you to combine thermal comfort and transparency, with the choice to open to the inside or the outside of the building, whatever fits the specific need.

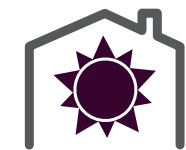

The elements come in every colour and finish, if desired, offering a different colour for the interior and the exterior, all in order to perfectly match the building.

Your choice of CF 68 guarantees a complete freedom in design. The system can be used to fold open to the inside or to the outside, from 1 up to 7 opening leaves, removing all borders and blending interior into exterior.

Besides the standard window hardware solution, CF 68 can feature a main door principle, in which the first leaf is used as an entrance door without affecting the other folding leaves. This entrance door is equipped with a handle on both sides, so it can be accessed from the outside.

- ❶ Thermal insulation down to $1.1\text{W/m}^2\text{K}$
- ❷ Glazing thickness up to 44mm
- ❸ Security to British and European standards including Secured by Design
- ❹ Inward or outward opening
- ❺ Four threshold options
- ❻ Water resistance up to 600Pa
- ❼ 2 to 7 door leaves
- ❽ Maximum height 2500mm
Maximum door leaf width 1000mm
- ❾ High spec stainless steel rollers

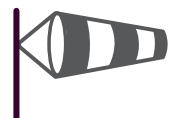

U-values up to 1.7 W/m²k

Watertight to 30kg per square metre (300pa)

Resistant to wind loads of over 120mph (1800pa)

PAS 24 approved
