**Transform your conservatory into
an all year round living space!**

"We can now use our conservatory daily"

Mr Tanner, Barnsley

Sometimes a conservatory can be...

- Too hot in summer
- Too cold in winter
- Too noisy in rainy weather
- Too much glare in direct sunlight
- Suffer from build up of airborne dirt
- A waste of valuable living space

We have the solution for new or existing conservatories

The SupaLite roof system has been designed to be installed as a retro fit onto existing conservatory window frames, converting your existing conservatory into a usable all year round sun-room. We can provide you with a brand new sun-room from the beginning, including frames and baseworks should you require us to provide this complete service.

If you have an existing conservatory, you will probably agree that it is too hot in summer and very cold in the winter. With the incredible u-value of just 0.18 (0.15 for the Scottish market) of the SupaLite roof system you will never experience these extreme temperature changes ever again!

We have fully qualified structural engineers that can provide you with all your building regulations requirements should you need them.

"We absolutely love it! We spend hours in here now, we don't use the lounge anymore" Mr Frazer, Doncaster

SupaLite Benefits

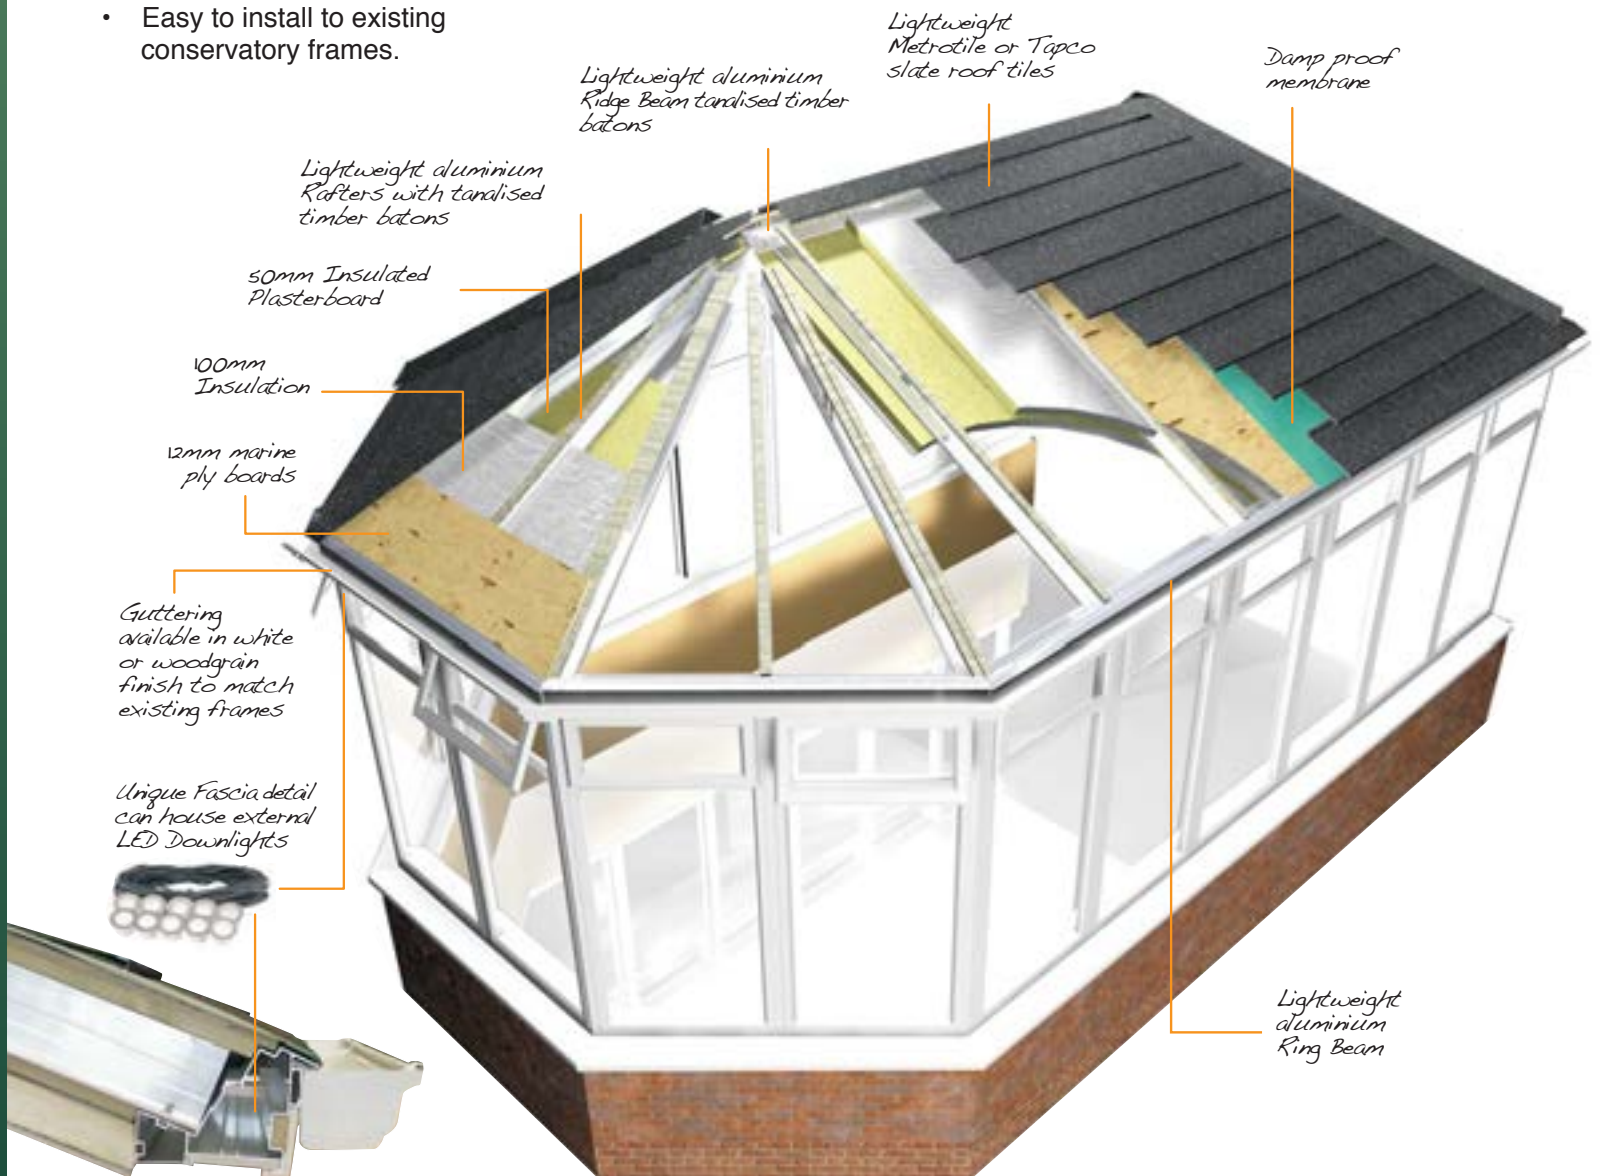

- SupaLite gives an incredible u-value of 0.18 (0.15 for the Scottish market) that meets total building regulations.
- Lightweight aluminium fully structural frame with frame connector system for when new windows or doors are to be fitted to a new or existing building.
- Choice of tile and slate colours, all tiles are tried and tested for many years in USA, Canada and Australia, giving you total peace of mind in extreme weather conditions.
- 25 year guarantee on tiles with a life expectancy of over 40 years.
- Large roof vents are available to allow in maximum light.
- Full range of colour matching fascias, soffits and gutters to suit your choice of windows.
- Choice of internal ceiling finishes (plaster or tongue & groove timber effects).
- Easy to install to existing conservatory frames.

Metrotile

Metrotile is still the only lightweight steel roofing manufacturer that is able to offer a 25 year guarantee on all of our profiles. Crafted to the highest standard under meticulous conditions, each Metrotile is forged from drawing quality 3 steel, the highest steel grade available.

The low carbon level within the steel allows the metal to flow evenly during manufacture. creating a highly durable tile while practically eliminating the risk of fracture.

TapcoSlate

For centuries, slate roofing has been desired for its durability and beauty. With authentic surfaces and edges, TapcoSlate highlights the handsome character of slate, at the same time enhancing roof performance through innovative design. Unlike natural slate, TapcoSlate won't break or delaminate.

TapcoSlate gives you the power to evoke both historical elegance and outstanding modern-day style. Our slates are created with moulds cast from real slate to capture genuine peaks, plateaux and curves. Colour-through design and UV stabilisation ensure "stay-true" richness for traditional colours

Roof Vents

The well-designed centre pivot allows the sash to be opened in a range of positions, thus increasing the amount of fresh air which can be drawn into the room.

The sash can also be rotated through 180° and locked, allowing easy and safe cleaning of the outer pane to be carried out. Our windows have a much greater surface area when compared with similar sized windows made by other manufacturers. As a result they maximise the amount of natural light in a room.
